

## **To Satisfy Global Demand - MDSi Opens New EMEA Facility**

### ***Industry Leader Expanding European Presence to Better Serve Growing Client Base and Capitalize on Market Opportunities in the Region***

MDSi, the industry's leading authority on reverse logistics, refurbished technology and reducing technology expenditures, today announced the opening of the company's new European (EMEA) facilities in Slough, England.

The opening of this office reflects the importance of EMEA in serving the needs of the company's growing, global client base, and builds upon the continued expansion of MDSi operations worldwide.

"We are expanding operations in Europe to better serve our growing client base and capitalize on the many exciting market opportunities in the region," said Lisa McDonald, MDSi Executive. "We are confident that our successful track record of delivering immediate, measurable value to global leading companies will extend throughout Europe as we continue our rapid rate of expansion."

"More leading companies are making the strategic decision to think green and employ reverse logistics programs by refurbishing and redeploying existing technology assets," continued McDonald. "MDSi's proven history of enabling companies to transform their worldwide logistics operations with rapid ROI, dramatic revenue and profitability improvements, and increased customer service levels places the company in an ideal position to capitalize on market opportunities and further extend our reach."

MDSi currently provides services in more than 50 countries in Europe with a global technology program covering 250 locations and 70 countries. All of which have contributed to a corporate growth factor of ten over the last 12 months.
